Matomo

The password is an auth token generated under Administration, Personal, Security of the Matomo account - never the account password. Create it with 'Only allow secure requests' switched off: this driver sends the token in the body of every request, never as a URL parameter, but the platform itself still has to accept that transport for the token to be

Notes

This data model declares no keys yet; the dotted relations are derived from column names.

Data dictionary

Every table and column of this data model is described with its documentation on documentation.invantive.eu, where the poster is also available in other languages.

Notes

The boxes are grouped by topic and coloured by category. A relation is drawn in the topic of the table holding the key; a box in pale grey is defined in another topic.
